

JAVASCRIPT ENGINEER

BuildEmpire are looking for a self-motivated and passionate JavaScript engineer who shares our values in collaboration, creativity and innovative ideas to work alongside our existing team on exciting projects.

We require you to have a desire to learn new technologies with an interest in self-improvement and the ability to clearly articulate problems to colleagues and customers of varying technical knowledge.

We require the candidate to have experience of:

- JavaScript
- NPM
- HTML
- CSS
- Git
- MVC + frontend frameworks
- SCSS or other pre-processors
- Task runners + build tools (eg. Gulp/Grunt/Webpack)
- Working on large scale frontend applications)

It would be nice for the candidate to have experience of:

- Git Flow
- EmberJS
- esnext code
- Handlebars or similar templating
- Writing tested code + testing frameworks (eg. Jasmine/Mocha/Qunit)

What are we offering in return?

At BuildEmpire, we know that a happy team does the best work. It is important to us that you enjoy coming to work and are given the opportunity to grow and be innovative in your

role. Here are some of the benefits we offer to make sure our staff feel great about their job:

- Half day Fridays!
- Employee-focused and friendly team
- Employer-matched pension scheme (4%)
- Annual hack days (2 days a year to work on anything that will benefit the company)
- Flexible working hours, and work from home opportunities
- Light and spacious offices with on-site parking, excellent transport links and amenities close by in Didsbury
- Relaxed dress code and music while you work
- 24 days' holiday, plus bank holidays
- Professional development and training opportunities
- Social opportunities outside the office, for those who wish to take part

About Us:

We are a company owned and led by a developer, with over 15 years' commercial experience. We work with household names such as Breville, Crockpot, Apollo Global and BPP. We work on a range of bespoke web applications, Virtual Learning Environments (VLEs), Content Management Systems (CMSs), eCommerce shop fronts amongst other exciting projects. We value innovation and great relationships with our clients very highly, and because of this we are a growing business with plenty of opportunities for progression. Our team are the best in their field, and our work reflects this.

If this sounds like a team you want to be a part of, send us your CV along with a cover letter, and some examples of your design work, to recruitment@buildempire.co.uk.
